

# TAVEL PLUS

## RANGE OF CLOSING HANDLES

- Renewed look: 2 different knob models
- Also available in the version with key
- Smooth operation
- Excellent sturdiness
- Solid fixing
- For inward and outward openings

# TAVEL PLUS

## THE FUNCTIONALITY IS SIMPLE

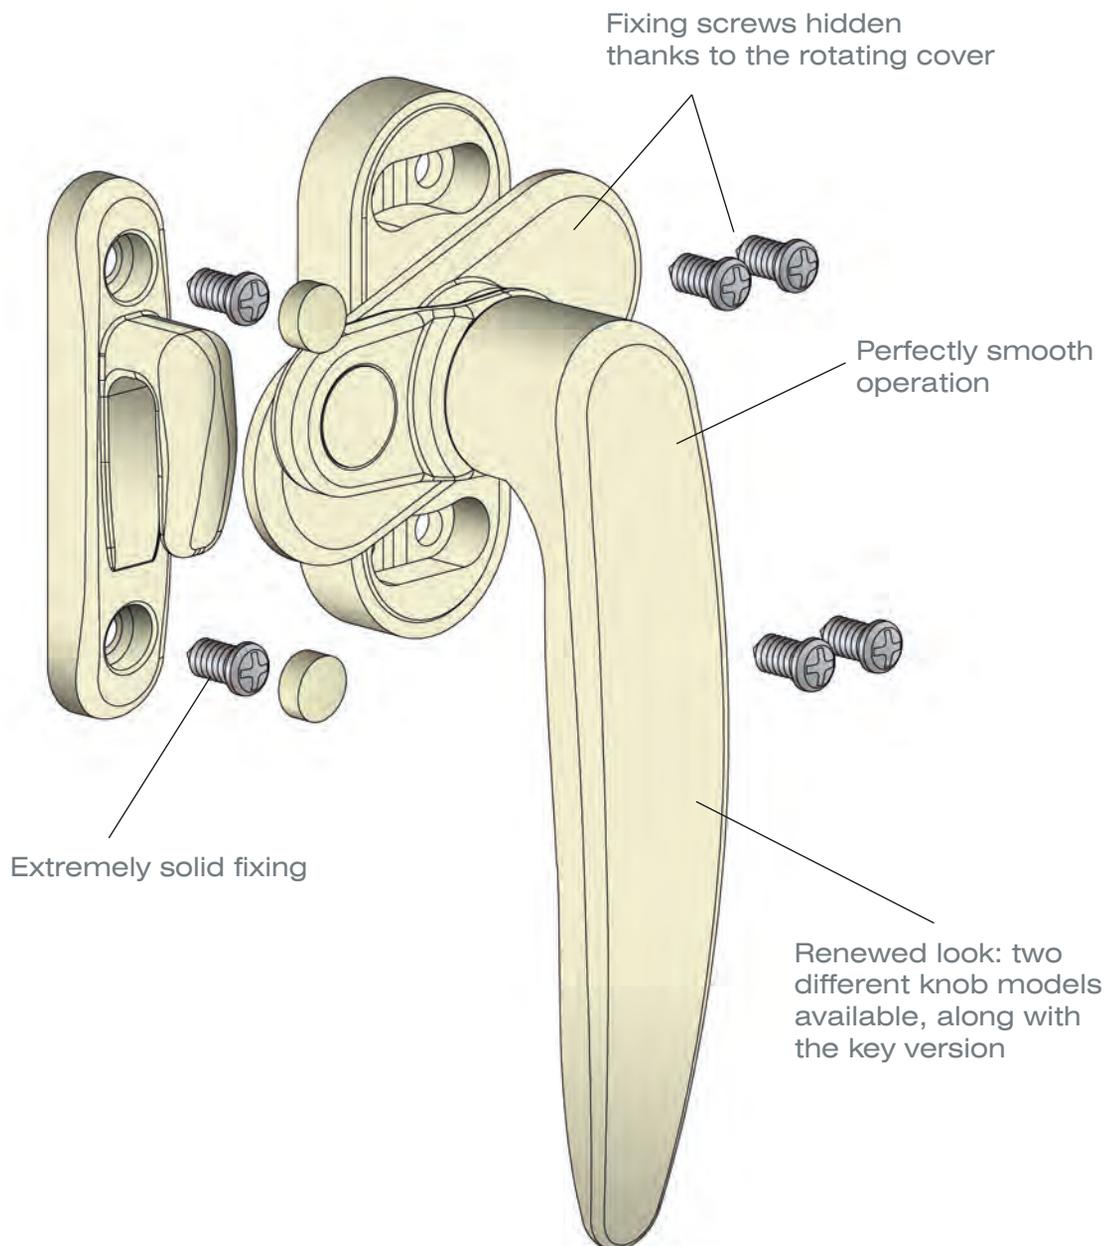

As everybody knows, often the simplest ideas are also the most effective ones. Just like *Tavel Plus*, Savio's new line of closing handles: its basic mechanism, sturdy and versatile, makes it the ideal solution for a wide range of applications.

One line, two versions: Tavel Plus offers knobs with **two different designs**, each one with its own system to hide the fixing accessories.

Suited for **inward** or **outward** openings, it is preset for all flush and stepped profiles, with standard thickness of up to 8 mm and an optional kit for thicker stepped profiles.

In addition, a **model with key** is also available, and all versions can be easily **reversed**: just a few simple steps are needed to switch from a right-hand grip to a left-hand one.

## New range of closing handles for inward and outward openings

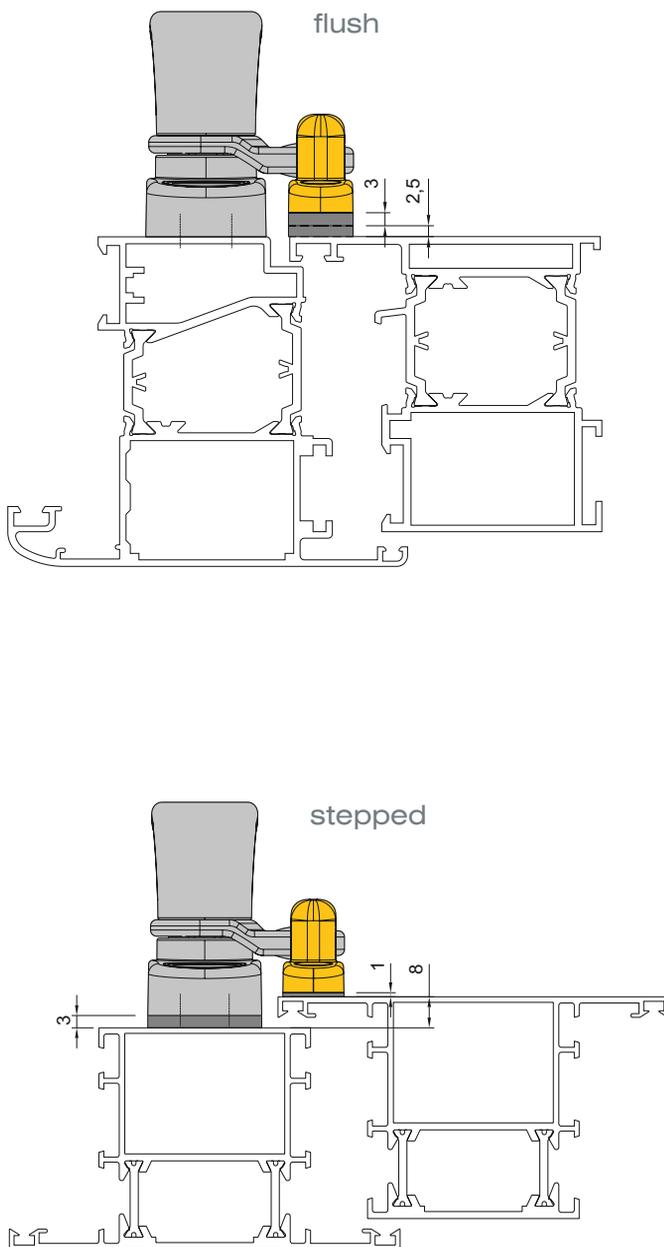

... in addition:

- Reversible
- Equipped with shims for different rebate heights
- Excellent sturdiness

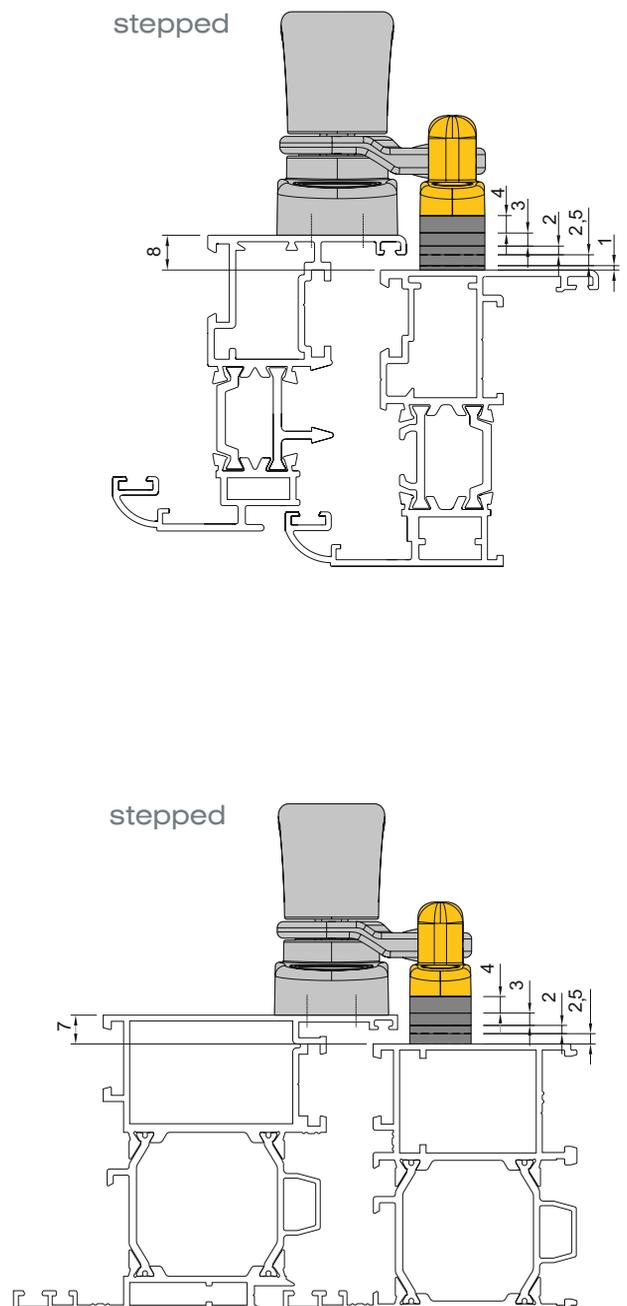

# Installation

The new range of closing handles can be installed on different applications, as the handles are preset for use on both flush and stepped profiles. The standard version contains shims for stepped profiles up to 8 mm; a kit of shims is also available, supplied separately, for thicker stepped profiles.

## OUTWARD OPENING

## INWARD OPENING

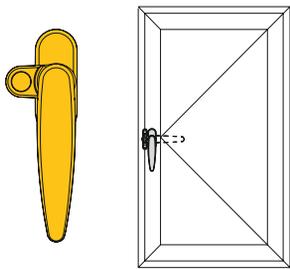

# Reversibility

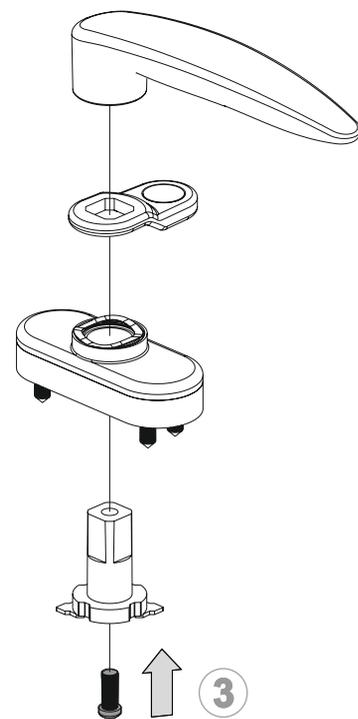

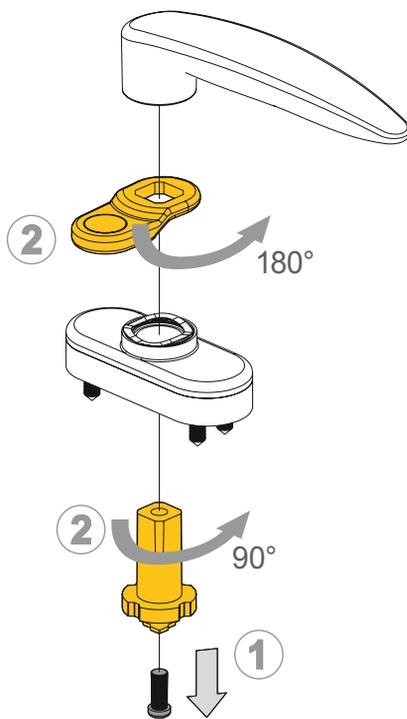

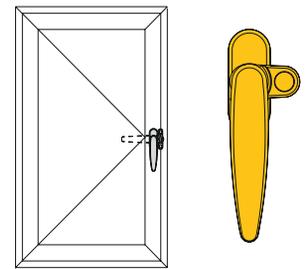

All three handle versions are reversible, and they come preset for the right-hand grip. To reverse them, simply unscrew the knob locking screw and rotate the coupling and the internal limit switch.

## SWITCH FROM RIGHT-HAND VERSION TO LEFT-HAND VERSION

right-hand

left-hand
