

Declaration of conformity in accordance with Regulation (EC) No. 1907/2006 (REACH)

In accordance to the provisions of the **REACH Regulation (No. 1907/2006)**, which came into force on June 1, 2007, anyone who manufactures or who imports from non-EU countries a substance as such or contained in a mixture, in quantities of one ton or more per year, must have registered it with the European Chemical Agency (ECHA) by May 31, 2018.

With reference to the provisions of the REACH Regulation we hereby inform you that our company is classified as a manufacturer of "complex articles."

We do not manufacture or supply "substances" or "mixtures," and our articles do not involve the "intentional release of substances"; therefore, there is no Reach registration requirement for the substances contained in our products.

In particular, our company constantly monitors that the substances in our products do not belong to the Candidate List (<http://echa.europa.eu/it/candidate-list-table>), or Annex XIV or Annex XVII of REACH, in accordance with what is stated in the Brief Profile recorded on the ECHA website for registered substances (section 3 of each SDS), and we have verified that the **Safety Data Sheets of our suppliers comply with Annex II of Regulation 878/2020, effective January 1th, 2023, containing all the registration numbers of the substances mentioned in them.**

Some steel alloy or brass alloy components, due to the nature of the alloy itself, may contain Lead in concentrations slightly higher than 0.1% by weight (specifically, steel alloys "11SMnPb37" and "Pr80", as raw materials, contain lead in a maximum concentration of 0.35% by weight, and brass alloy "Ot58Pb" contains lead in a maximum concentration of 2.50% by weight); so we have proceeded to request from our supply chain the SCIP codes related to the components themselves, which have been made known as soon as they are received.

We remain at disposal for any clarification.

Kind Regards.

Chiusa di San Michele (TO), 18/04/2023
