# REKLÒ

The era of traditional door closers is over.  
**The *Reklò* era begins.**

## First Savio rule: change the rule!

Reklò the new era for door closer, **one product for two functions**: hinge and door closer together.  
Performance, resistance and design suitable for any application.

### Opening up to 180°

- **Minimal** design
- **Adjustable** snap and closing speed
- **Certified** and tested according to the European Certification

- **EN 1154:2006** certifies its use under force 3 specific for the door closer.
- **EN 1935:2002+AC:2003** on doors positioned on escape routes.
- **EN 1670** grade 5 for corrosion resistance (480 hours in salt spray).

# PANIC DEVICES

**Safety and design at your fingertips.**

## 360° security

- Tested according to EN 1125:2008, exceeding 200,000 cycles.
- Compact and functional design: clean aesthetics meet excellent functionality.
- Antibacterial protection: high-quality coatings ensure hygiene in public spaces like schools, hospitals, and offices.

**Juvarra & Brunelleschi** tested over 200,000 cycles, reaching 2 million, proving exceptional durability.

**Circeo** the original design with Luigisavio logo, honoring the founder's legacy.

**Bernini & Cellini** exclusively designed by **PININFARINA**.

- **EN 1125:2008** certifies its compliance by successfully passing the 200,000 cycle test.
- **Grinz Finish** the texture that offers 30% more impact resistance and optimal weather protection. Easy to clean and reduces fingerprints for hassle-free maintenance.

# RIBANTA SERIES

The first **invisible hinge** in the world.

## High invisible technology

Technology becomes the protagonist and combines the elegance of *Made in Italy* with the innovation reached by use of cutting-edge materials.

Tilt & Turn technology tested for excellence, which guarantees quick installation, flexibility and modularity in use, with an extraordinary carrying capacity.

- Innovative design
- Capacity up to 180 Kg
- Three-way adjustment
- Concealed hinges

# ROLLUP & MAGLEV

**Lift & Slide windows and doors that open to the light.**

## +40% clearness for breathtaking views

Savio designed and is the exclusive manufacturer of RollUp and MagLev, worldwide unique sliding systems, with features satisfying design, quality and safety. Motorized lift and slide is the ideal solution for vertical surfaces with large glazings, making the interior space brighter (+40% light) providing views and boundless panoramas. The revolutionary patented automatic Lift & Slide system guarantees handling of large dimension elements up to 1,000 kg per sash.

## Enter the new era

- The **freepass threshold** is unique in the world for its technology: a barrier-free solution, nimble and safe in daily use.
- Think big for a great view: **+ 40% clearness**
- **Wider surface** available.
- More comfort, **more safety**, higher quality standards.
- **Barrier-free**, safety with zero maintenance.
- **RollUp** has a maximum weight capacity of **400 kg** per leaf.
- **MagLev**, thanks to its magnetic levitation technology, reaches **1,000 Kg** per leaf.

- **1000 kg as light as a feather**
- **No threshold, no maintenance**

# AIRCARE

***The new frontier for home wellness;  
personal clean air at home***

## Pure, safe, healthy air

Aircare is Savio Thesan's revolutionary contribution to a sustainable future: an evolution that revolutionizes the logic of indoor air treatment and safe antibacterial solutions.

**Aircare ES:** a dual-flow system that filters incoming air, recovers energy, extracts exhaust air, removes internal pollutants, prevents external pollutants from getting in, controls humidity, and prevents mold formation. Available in frame-fitted, recessed, and wall-mounted versions.

**Aircare AE:** a single-flow exhaust system that extracts exhaust air, removes internal pollutants, and reduces humidity levels. Ideal for bathrooms and kitchens when paired with Aircare ES systems. Available in integrated window frame and recessed wall-mounted versions.

### VIRUS FREE

The HEPA filter captures 99% of pollutants and contributes to Covid19 prevention in offices and apartments, introducing clean and safe air into the interior spaces.
